Thanks to the independent treasury, the government has not suspended paymout, as it was sumpelled to do by the failure of the banks in 1837. It will continue to discharge its listiff. opie in gold and allver.

That's the shout " Old Buck" set up, in his message to Congress, last Decemberthe very message, too, in which he express ed the belief that the government would have to borrow a few millions, to enable it to get along through the hard times .--The borrowing was accomplished, on the pledge of some paper "promises to pay" by the government, some years hence .these "promises to pay" are termed Treasuzy notes, and bear an interest of 3 and 5 per cent., yet they have been already and repeatedly sold below par in Wall street.

What particular " thanks," therefore, are due to the "independent treasury," in the premises, is not very apparent. The imporsing merchants, who can pay neither the smallest nor largest amount of duties at the custom house except in gold or silver, and every body who has any dealings with the Post office, can "thank" the Sub Treasury if they like; but we like to see something very different to be than sful for, hefore we would honor any very large drafts upon our gratitude.

If the administration had the maply pat triptism to stand firmly on the side of Freedom, as the main spirit and letter of the Constitution so fully and plainly demand; Withad the probity and bravery to demand a reduction of fully one half the present exressive cost of the Army and Navy, (a mes. sure it could easily, if so disposed ;) -and, above all, if it had the decency and integrity to call for an immediate and extensive retreachment, by Congress, of the Executive appointing power, that would be something that we could afford to be thankful for,

CORRESPONDENCE

Wasniperen Ciry, Salurday, March 17. THE SENATE was not id session yesterday. : Neither is it sa day.

In THE House, the Committee on Public Lands has been instructed by resolution, to enquire into the disposition made by the State of Iowa of certain lands granted her for railroad purposes. It has also been partially agreed to dernte until I o'clock on Thursday next to a general debate on the Kansas question, while nominally discussing the Deficiency bill, and then to take the vote upon the Senste's Kansas till, without further debate. And, further, to close the general debate on the Deficiency bill on the next day, Friday next. A large number of private bills were pesterday reported and placed on the calendar. The Kansas question was discussed by Messrs. Smith, of Va., Palmer, of N. Y., and Morris, of Pa. A list of party members, desiring yet to be heard on the Kanssa question, has been handed to the Chairman of the Conmittee of the Whole House-thirty-one desiring to speak against the Lecompton Constitution and nine in favor of it.

A Caucus, on the Lecompton question is to be held this evening by the Dunoeratic Members of the House.

PERSONAL-The Hon. Linn Boyd, of Ky., and the Hon. John W. Davis, of Ind., both ex-Speakers of the House of Repre. sentatives, are now in the city. The Hon Mr. Carathey, of Mo., is expected to arrive here from Cuba, in improved health, during the fore part of next week.

THE INCREASE OF FUNDS, subject to draft, in the U. S. Treasury, during the week ending on Monday last, was \$3,-¥18.430 14.

THE LONG PILARTERS, now arriving for the U.S. Treasury building, weigh from forty to forty-five tons. It requires ten heavy roke of cattle and four stout horses to draw them. It is stated that the cost of each pilesters, when in place on the building, is \$2,500 - enough to buy a good

Bmithgonian Lecture. Prof. Schole Do Vere, of the University of Virginia, lectured here last evening, at the San'thyonian Institate, on the subject of "John Low and his edebrated Minimippi Speculation." He narrated the nublished history of the case, and intimated that its disastrous effects upon the national prosperity of France, should have been a historic warning to save our own country from a similar fate. Ilu: the said John Law banks had been allowed to furing up all libitain throughout the country, and, thank the Lord, had broken, and taught in a lesson by our own experie es which we had failed to learn by this experience of others.

SPECIATOR.

NEW YORK, March 29, Mo. Epiroa :-- The Spring weather seems of late so constant and thorough, that everyhody is taking it for granted we are fairly through with the other sort,-but I must confers to some fears of a recurrence of cold, which may prove disastrous to early regetation, perhaps wholly destructive to the fruit crop. A winter so extraordinary as we have now had, is seldom, followed, by an ordinary spring. And a certain rustic proverb remindeth us of the impropriety of hallowing till we are fairly out of the woods." We have had but a single storm for some time past, and that was a furious dust hurricane, that swept the great thoraughfares, including stately and starchy Broadway, with a degree of violence not particularly respectful to fine dresses, nor comfortable to weak eyes.

The revival of business is a theme of general remark and wide congratulations, but even this pleasing fact, which is now gowing more and bester confirmed, is in a measure colleged by the absorbing interest felt (I was going to say by all chaces, but certainly by most,) in the great Religious movement of the day. The union prayer meetings at John Street Methodist Church, the old North Dutch in William Street, Burtons old Theatre in Chambers Street, and Stuyvesant Institute, are daily througed by eager multitudes; and the kindred inovesocieties, so my to increase rather than abste. A discourse addressed to Piremen Music.

The Tribune folks have issued an 8-page extra of their sheet, chiefly devoted to an account of the great Religious awakening of 1858.

A series of lectures on the Woman question, by James T. Brady, G. W. Curtis, E. II. Chapin, Eli Thayer and Lucy Stone, has been arranged to come off weekly during the month of April. The subjects will be Woman's industry, her position in law, (rightful and actual,) right of suffrage, and her destiny as affected by emigration. The betures cannot fail to prove interesting and instructive.

A rillain named Finley, alias Howard, and his reputed wife, have been brought prisoners from Maryland on a charge of abducting a colored girl from this city, only 14 years old, under false pretences of hiring her for service at Newark, spiriting her off to Washington by an express train, and teying to sell her as a slave. The plot failed, and the girl is saved. The culprits, doubtless, deserve a good long stege at Sing Sing.

The news from California, by the steamer Moses Taylor, includes a most horris murder-story of a whole family at Grass valley, by poisoning with prussic acid-the Satanic deed perpetrated by the husband and father, Michael Brenan, upon a most estimable wife and three lovely little ones, and wi ding up by poisoning himself! Brenan was general agent for the Mount Hone Quartz Mining Company, and having lost has whole fortune, (some \$60,000) in the concern, and involved the Company to the extent of \$100,000 more, which he could see naway to cancel, he deliberately planned and executed the wholesale destruction of his family and himself. All were dead, when discovered. Brenan was a graduate of Trinity College, Dublin, was formerly a resident of New York, and a reporter for one of the daily papers. His wife was a woman of rare intelligence, speaking several languages, and highly esteemed by all who knew her. There was no evidence of domestic unhappiness. How these horrid tragedies seem to multiply, all over the world, of late years !

The great live most market in 44th street is lower than for many months past--Mayor Tiemann and his efficient police force are making a decided onset upon disorderly houses. A many noth charity spirce is to come off at the Covatal Palace on the 8th of April, for which extensive and expensive preparations are being made.

LOCAL NEWS. 46.

13 Da Batufelry afternoon last we visit. el the Methodia: Episcopal Church on Marlburn atreet in order to hear Mr. Wilcox of the firm of Sim nons & Wilcox perfor m for about an hour on the very large and fine organ which has been littly introduced into that Church through the agency of our friend Mr. Born Tourjee who purchased it of Measte, Simmons & Wilcox of Boston. The Courch has been somewhat remod ledon the inside and presents a very neat and comfortable appearence. The improvements we understand were designed and executed by Mr. Abram T. Peckham, Mr. O.orge Wilson and Mr. James Powell, Thru: heautiful chairs which are placed behind the pulpit were designed and built by the Mesora, Hazards winas good taste and neatness of finish is easily decernable in them. Yesterday we understand improvements on the outside of the Church were commenced which will consist chiefly of a new and imposing entrance. On the whole we should think that when the improvements are completed to this building it will not only be an ornament to the city but as convenient as any of our churches of its size. The Rev. Mr. Talbot the present pastor of the above Church is now absent at the annual conferonce which is being held at Norwich and we hope that his congregation will be able to welcome him back again before many days have passed and retain his services for some time to cone.

To We are obliged again to apologize for the appearance of our paper to-day, as we have had to print it again on a hand press, our power press not having yet been repaired and suitable for use.

Spoiling Por stocs.

Is it any wonder that we rarely if ever see such a thing as good potatoes, when every dealer takes the most effectual way in his power to apoil them for food? Is it possible that neonly who grow potatoes or those who are constantly dealing in them, do not know that they are always injured by exnosure to the light, and if the exposure is continued long enough, they are utterly ruined? So great is the change that a tuber, naturally mealy, autritious and palatament, throughout the various churches and | ble, is changed by exposure to light, and by that alone, during its ripening period, to a green, bitter, watery mass, and every hour last night, by an able speaker, drew several, that a potato is exposed to the light, after thousands of listeners, to the Acad my of taking it out of its dark bed where it grew, it is injured in some degree, though not actually spoiled until it has been exposed for a long period. There is no way of preserving potatoes fit to eat except by keeping them in darkness. Let this be remembered.

> Horses Should be Exercised Daily. -Houses require daily exercise in the open air, and can no more be expected to existwithout it than their owners. Exercise is an essential feature in stable management, and like well opportuned fond, tends alike to preserve the health of the horses. Daily ex reise is necessary for all horses, unless they are sick; it assists and promotes a free circulation of blood, determines morbitic matter to the surface, developes the muscular structure, creates an appetite, improves the wind, and finally invigorates the whole system. We cannot expect much of a horse that has not been habituated to sufficient daily exercise; white such as have been daily exercised, and well managed, are capable not only of great exertion and fatigue, but are ready and willing to do our hidding at any season. When an animal is overworked, it renders the system very susceptible to whatever murbid influences may be present, and imparts to the disease they may labor under, an unusual degree of severity. The exhaustion produced by a want of rest is equally dangerous; such horses are always a nong the first victims of disease, and when attacked, their treatment is embarrassing and unsatisfactory -Moore's Rural New Yorker.

Ynnkee Doodle.

Vieuxtemps' violinistic execution of Yankee Doodle" is thus described by one "Boraz," a droll Mobilian :

"He played it low down, and then high up; with all four parts at once; with the bow up against the bridge—without any bow at all; he played it backwards and forwards, sideways and crossways—began at the end, and left off at the beginning, began at the middle and left off at both ends, their commenced at toth ends and finished in the milldle; twanged it like a guital growled it like a bass-viol, squeaked it like growled it like a base-viol, squeaked it inke a filte, warbled it like a flute, and picked it out like a finance. It was Yankee Dooille all the time, however—sike a boy whistling; amon, like a pair of harmonious cuts, then again with all the "wariations," which daplayed and set off the original air, as an array of jewels adorns the beauty of the

Ann Harbou, November 5, 1856.

Prof. O J. Wood—Dear Sir; I have heard much said of the wonderful effects of you's Hell-Rectorative, but having beenly 1960 charted by quackery and quack mostrous, hair dyes. So., I was disposed to place your Rectrative in the same category with the thousand and one loudly freingived quick remedies, until I met you in Lawrence county some months slade, when you gave, me such assurance as included the trial of your Restorative is my family—flest by my good wafe, whore hair but become very thin and entirely white, and before calculating one of your large bottles, her has wes restrict anouth had thickened and become beautiful and glossy; upon, and entirely over the heard 1 she continues to use it, not simply the cause of its healthful influence upon the bead and mind. Others of my family and friends are using your Restorative, with the Impriest effects; therefore, my skepticism and doubt it proference to its charifter and value are chiraly removed; and I can and do most conditally did confidentially recommend its use by all view would have their hair restored from white or grey (by reason of sickness or age,) to oxiginal color and beauty, and by all young persons who would have their hair heautiful and glossy.

Very truly and gratefully yours,
SOLOMON MANN.

SOLOMON MANN.

Friend Wood:—It was a long time after I saw you at Blishield before I got the bottle of Restorative for which you gave me, an order mon your agent in Detroit, and when I got it we concluded to try it on Mrs. Mann's laint as the surest test of its power. It has done all that you assured me it would do; and others of my family and friends, having witnessed its effects, are myn using and recommending its use to others as entitled to the highest consideration you claim for it.

Again, very respectfully and truly yours.

SOLOMON MANN.

CARLYLE, ILL., June 23, 1852.

I have used Prof. O. J. Wood's Ifair Restorative, and have admired its wonderful effects. My halr was becoming, as I thought, necessively gray, but by the use of his Restorative it has resumed its original color, and, I have no doubt, premanently so.

16.7 Managers of Maryland State Lotteries.

LOTTERIES.—The Lotteries of Samuel Swan & Co., are chartered by the State of Gourgia, and have sworn commissioners appointed to superistend their drawings, and certify that everything connected with the same is done in a stricty honorable manner.—They offer to the public a fair opportunity for investment, the interests of parties at a distance being as well protected as though they were present. The managers would respectfully call attention to the fact that all persons have a legal right to send unders for tickets to Georgia, as the lotteries of Samuel Swan & Co., are authorized by the Legislature of that State. A lottery will be drawn every Saturday throughout the year, all orders received being filled in the drawing next to take place after the same comes to hand. According to the scheme on etteket in everyten must draw a prize. Tickets are glo; halves, \$5; quarters, \$2.20. No tickets sent unless the money accompanies the order. The drawings are up in the principle of one number on each ticket, and are as simple that none can fail to understand them. There is no combination of numbers to mistife the buyer. Prizes varyfrom \$40 to \$66,000; every prize being drawing and result of drawing forwarded to all purchasers.

3.7 A list of the numbers that are drawn from the wheel, with the amount of the prize-that cach one is entitled to, will be published after every drawing, in the following pin pers;—Augusta (Geo.)
